nternational application No. PCT/EP2004/010388

Box II Observations where certain claims were found unsearchable (Continuation of it	em 2 of first sheet)
This International Search Report has not been established in respect of certain daims under Article 17(2)	(a) for the following reasons:
1. X Claims Nos.:  — because they relate to subject matter not required to be searched by this Authority, namely:	
Although claim 26 is directed to a method of treatment of body, the search has been carried out and based on the al compound/composition.	the human/animal leged effects of the
Claims Nos.:     because they relate to parts of the International Application that do not comply with the prescribe an extent that no meaningful International Search can be carried out, specifically:	d requirements to such
Claims Nos.:     because they are dependent claims and are not drafted in accordance with the second and third.	sentences of Rule 6.4(a).
Box III Observations where unity of invention is lacking (Continuation of item 3 of first	sheet)
This International Searching Authority found multiple inventions in this international application, as follows:	
see additional sheet	
As all required additional search fees were timely paid by the applicant, this international Search I searchable claims.	Report covers all
2. As all searchable claims could be searched without effort justifying an additional fee, this Authority of any additional fee.	v did not invite payment
As only some of the required additional search fees were timely paid by the applicant, this Internal covers only those claims for which fees were paid, specifically claims Nos.:	tional Search Report
4. No required additional search fees were timely paid by the applicant. Consequently, this internation restricted to the invention first mentioned in the claims; it is covered by claims Nos.:  1-26 (part)	nal Search Report is
Remark on Protest  The additional search fees were accompanied  No protest accompanied the payment of additional search fees were accompanied.	

## FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

#### 1. claims: 1-26(part)

Method of screening for therapeutical agents useful in the treatment of Alzheimer; method for diagnosing Alzheimer; pharmaceutical compositions comprising agents which bind/regulate the activity of a RNPEP polypeptide for the treatment of Alzheimer; pharmaceutical compositions for the treatment of Alzheimer comprising the RNPEP polypeptide; method for preparing a pharmaceutical composition useful for the treatment of Alzheimer.

#### 2. claims: 1-26(part)

Method of screening for therapeutical agents useful in the treatment of hematological diseases; method for diagnosing hematological diseases; pharmaceutical compositions comprising agents which bind/regulate the activity of a RNPEP polypeptide for the treatment of hematological diseases; pharmaceutical compositions for the treatment of hematological diseases comprising the RNPEP polypeptide; method for preparing a pharmaceutical composition useful for the treatment of hematological diseases.

#### 3. claims: 1-26(part)

Method of screening for therapeutical agents useful in the treatment of cancer; method for diagnosing cancer; pharmaceutical compositions comprising agents which bind/regulate the activity of a RNPEP polypeptide for the treatment of cancer; pharmaceutical compositions for the treatment of cancer comprising the RNPEP polypeptide; method for preparing a pharmaceutical composition useful for the treatment of cancer.

### 4. claims: 1-26(part)

Method of screening for therapeutical agents useful in the treatment of respiratory diseases; method for diagnosing respiratory diseases; pharmaceutical compositions comprising agents which bind/regulate the activity of a RNPEP polypeptide for the treatment of respiratory diseases; pharmaceutical compositions for the treatment of respiratory diseases comprising the RNPEP polypeptide; method for preparing a pharmaceutical composition useful for the treatment of respiratory diseases.
